New England Firearm: Partner Plus II (Ultra Slugger). This is a single shot 12 gauge 3" chamber. The barrel is from a ten gauge but bored for the twelve for accuracy such as they do with varmint/tac rifles. Barrel is fully rifled and shoots sabot slugs with accuracy as designed. I never took it into the woods but sighted her in and she is accurate. I was going to make this into a long range slug gun.

Limited edition with fancy laminate wood. Must see to appreciate. If your looking for an accurate slug gun in mint condition this is it. safe stored.

\$220.00
